

# SOMEWHERE SAFE

## SECURE FACILITY CAPABILITIES BRIEF

Ultimate Spatial Isolation. Impermeable Custody.

### CORPORATE OVERVIEW

Somewhere Safe LLC delivers climate-controlled, structurally hardened vault environments engineered to safeguard highly sensitive data, private corporate records, and high-value physical assets. Built with anti-intrusion barriers and backed by independent off-grid power, our facilities provide absolute storage safety and chain-of-custody tracking with total structural immunity to public utility grid failures.

### CORE COMPETENCIES

- **Structurally Hardened Vaulting:** Reinforced concrete vault casting, ballistic blast-door engineering, biometric airlocks, and physical perimeter defense against extreme environmental forces or forced entry.
- **Multi-Redundant Climate Control:** Thermal stability engineering, continuous humidity regulation, and particulate filtration designed to protect fragile physical records, legal trust files, and sensitive electronic storage media.
- **Independent Off-Grid Continuity:** Solar microgrid configuration, backup energy storage, and dedicated communication channels ensuring security monitors remain fully online under any circumstances.

### CORPORATE IDENTIFIERS & PROCUREMENT CODES

493190	Other Warehousing and Storage	PRIMARY
561621	Security Systems Services	SECONDARY
493110	General Warehousing and Storage	SECONDARY

■ **Access Protocols:** Mandated multi-factor biometric identification, clear security screening logs, and continuous, automated auditing for an unalterable access history.
