

SUPERIOR CAR WASH

FLEET CARE CAPABILITIES BRIEF

Engineered Preservation. Resource Conservation.

CORPORATE OVERVIEW

AIRO Superior Car Wash delivers high-efficiency vehicle washing, automated fleet care, and advanced water reclamation systems designed to protect logistics assets and extend vehicle operational lifecycles. Engineered to handle intense dust and environmental wear, our systems focus on lowering fleet depreciation and reducing mechanical wear caused by abrasive desert grit.

CORE COMPETENCIES

- **High-Volume Fleet Care Logistics:** Rapid automated clean lines, continuous commercial vehicle wash tracks, and fleet tracking integration minimizing downtime for corporate delivery and service units.
- **Corrosion Control & Surface Protection:** Underbody decontamination, defensive ceramic shielding, chemical rust prevention, and exterior finish seals to prevent breakdown from salt and fine grit.
- **Closed-Loop Water Reclamation:** Multi-tier water filtration, sediment separation, oil-water separation, and reverse-osmosis purification loops reducing fresh water consumption demands by up to 85%.

CORPORATE IDENTIFIERS & PROCUREMENT CODES

811192	Car Washes	PRIMARY
811198	All Other Automotive Repair and Maintenance	SECONDARY
562910	Remediation Services (Water Reclamation Focus)	SECONDARY

■ **Utility Integration:** Engineered to connect directly with independent solar microgrids and off-grid water networks for uninterrupted operation independent of municipal utility lines.
